

# Black Holes

**G**            **C**            **G**  
Stars fall down on us  
**C**                            **G**  
    In a rain of dust  
**C**                            **G**  
A time will come  
**D**                            **G**  
    They'll all be gone  
**C**                            **G**  
    Who knows  
**C**                            **G**  
    Where everything goes  
                          **C**            **G**  
From where all is black  
                          **D**  
They won't come back  
                          **G**  
Will they come back ?
